

Apply Now for Summer 2025 Internships in Quantum Science at Sandia National Labs

Launch your career in quantum science with a paid summer internship at Sandia National Labs! As an intern, you'll work directly with researchers advancing applications including quantum computing, sensing, algorithms, and more.

Eligibility:

- You must be an enrolled undergraduate student at any CSU campus.
- You must be able to work 40 hours/week for 10-12 weeks between May and September 2025.
- You must be able to relocate to Albuquerque, NM or Livermore, CA (\$1500 relocation assistance).

This internship opportunity is open only to CSU students.
Made possible through the Department of Energy funded
Quantum Information Science & Technology (QIST) in the CSU Project.

Example Internship Projects Include:

- Exploring Topological Material-Based Device Physics
- Characterizing a Broadband Electro-Optical Modulator for Trapped Ion Quantum Computing
- Designing and Building an Optical Switchboard for Trapped Ion Atomic Clocks
- Artificial Intelligence for Brain-Computer-Interfaces using Atomic Magnetic Sensors
- Creating Accessible Materials to Introduce Quantum in Underserved Communities
